

USING THE INFANT CARRIER SALIA ELITE IN COMBINATION WITH STROLLERS

For use as a travel system, we recommend our infant carrier Salia Elite in combination with our strollers Sadena and Celona as well as with our buggies Lexa, Lexa Elite, Easylife 2 and Easylife Elite 2.

For a potential compatibility with strollers of other brands, please contact the respective manufacturer.

With the Salia Elite Adapter, the integrated infant carrier of the child seat can be easily and safely combined with RECARO strollers. Please note that an additional adapter is required, and the usage is approved for small children up to a weight of 9 kg. In combination with other strollers, please use the corresponding manufacturer's stroller adapters.

To use the infant carrier Salia Elite on a compatible stroller or buggy, you always need the Salia Elite Adapter and additionally the stroller/buggy specific adapter.
